THE PEDIATRIC TRAUMA COURSE THAT STARTS... WHERE THE OTHER COURSES END

Program Description

Unlike trauma education programs targeted at prehospital and emergency care providers, the Pediatric Care After Resuscitation (PCAR) course is specifically designed for acute care, critical care, perioperative, and rehabilitation nurses who occasionally or primarily work with children.

This pedi-specific version of the TCAR course gives inpatient staff members the foundational, evidence-based information and critical thinking skills necessary to meet regulatory requirements and provide excellent care to this challenging patient population.

Trauma Education in the Age of Social Distancing

No classroom? No problem! The new Live Online™ format brings PCAR to you, wherever you are. This virtual version of the course includes interactive quizzes, Q&A opportunities, and features the same in-depth material and high-quality visuals as in the classroom. Course content is divided into four, 4-hour parts to promote learning retention. Enrollment includes a full-color, 160+ page, downloadable eSyllabus.

TRAUMA CARE DOESN'T STOP AT THE ED DOORS. WHY SHOULD TRAUMA EDUCATION?

- Sepsis
- Fluid Management
- Delayed Injury Presentation
- Rhabdomyolysis
- Multiple Organ Failure
- Pain Management
- Non-Accidental Trauma
- Late Complications
- Compartment Syndrome
- Intra-abdominal Hypertension
- Wound & Skin Care
- Mobilization
- Nutrition
- Post Traumatic Stress
- Organ & Tissue Donation

Program Overview

The course begins by focusing on concepts relevant to the nursing care of the injured, hospitalized child:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners then have the opportunity to apply these concepts by participating in interactive expanding case scenarios that focus on admission-to-discharge care of hospitalized children with injuries to various body regions. Cases include the surgical, medical, and nursing management of children with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Craniocerebral trauma
- Spine & spinal cord trauma
